

Whom it May Concern,

I listen to the XM traffic and weather daily as a Truck Driver. This has been beneficial to the company, surrounding community, and myself, as I then don't become part of the problem because of traffic or weather. I find that all the services provided by XM are the benefits of all and the future of broadcasting. To limit this because local stations cannot keep up to date and current is moronic. I respectfully urge you to reject NAB's petition 04-160 and support XM's ability to provide us with superior broadcasting that moves us into the future.

with concern,

R. Baugous
